Hiring Manager
D. E. Shaw India Private Limited
Bengaluru, Karnataka

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Data Analyst – Futures position at D. E. Shaw India. With 2.5 years of experience as a Senior Business Analyst and a unique educational background combining an Integrated MBA in Business Analytics with a B.Tech in IT from IIITM Gwalior, I am confident in my ability to contribute to your Futures team's data quality backbone and support critical trading decisions.

My professional experience has equipped me with robust analytical capabilities and hands-on expertise in working with large-scale datasets. Throughout my career, I have developed proficiency in Python and modern data analysis libraries for handling complex numerical and time series data. My role has involved building and maintaining data pipelines, conducting comprehensive data quality checks, and identifying statistical anomalies—skills that directly align with the core responsibilities of this position. I have consistently demonstrated high attention to detail and a commitment to data accuracy, recognizing that even minor inconsistencies can have significant downstream impacts on analytical outcomes.

What particularly excites me about this opportunity at D. E. Shaw is the direct impact this role has on quantitative research and production trading. My background in both business analytics and information technology provides me with a unique perspective—I understand not only the technical aspects of data engineering but also the business context and strategic implications of data-driven decision-making. I have experience reconciling data from multiple sources, producing clear quality assurance reports, and collaborating with cross-functional stakeholders including developers, operations teams, and business leaders to ensure data fitness for critical applications.

My integrated degree program provided me with a strong foundation in statistics, mathematics, and computer science, while my professional experience has honed my ability to apply these concepts to real-world challenges. I am comfortable working with version control systems and command-line tools, and I am eager to deepen my understanding of financial markets and derivatives. I pride myself on my clear and concise communication skills, which enable me to effectively translate complex technical findings into actionable insights for diverse audiences.

I am particularly drawn to D. E. Shaw's reputation for innovation and analytical rigor. The opportunity to work in an environment where data accuracy is paramount and where my contributions will directly influence research and trading strategies aligns perfectly with my career aspirations. I am confident that my combination of technical skills, analytical mindset, and commitment to excellence makes me a strong fit for your Futures team.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and skills can contribute to D. E. Shaw India's continued success. I am available for an interview at your earliest convenience and look forward to the possibility of joining your team in Bengaluru.

Sincerely,
Shikhar Goswami
